Final-year Software Engineering student who has shipped production systems: a microservice SaaS backend at erxes, payments and 360° live streaming for Mongolia's Central Stadium, and an offline AI photo kiosk for the Coca-Cola museum.

EXPERIENCE

Full-stack Developer · Grand Ember Group — May 2026 – Present

360 Stadium — live 360° streaming and ticketing for the Central Stadium, Ulaanbaatar

- Owned the system architecture and core development of the streaming website and kiosk ticketing.
- Integrated **QPay, POS API and E-Barimt**: kiosk tickets print with an e-barimt receipt and a QR code read at the entry gate.
- Built live delivery on the **Wowza** engine through a CDN, with recordings stored on **AWS S3**.
- Streamed the **Naadam opening ceremony** and wrestling matches live in 360°.

`QPay · E-Barimt · Wowza · CDN · AWS S3`

Backend Developer · Erxes Inc — Oct 2025 – May 2026

Joined as an intern; became the main backend developer of the Tourism team

- Worked on the migration of erxes from version 2 to version 3 in a microservice architecture.
- Ported the **document Template module** to v3, integrated with the Sales Pipeline for reuse across tenants.
- Built the create / edit logic for tours tied to each tenant's itinerary.

`TypeScript · Node.js · Apollo GraphQL · MongoDB · Microservices`

Programming Instructor · Tee Education — Apr – Jun 2025

Taught Python basics to beginners and Scratch programming to children

FREELANCE

AI Face Swap Photo Kiosk · Coca-Cola Museum — Sep – Oct 2026

Offline 55″ touchscreen kiosk: GPU face swap into character art, downloaded by QR over local Wi-Fi

- Built the themed kiosk UI and the admin panel that manages the templates and pictures shown on the kiosk (team of two).
- Added spoken guidance for each screen, uploaded and managed from the admin panel.

`Python · PySide6 · PyTorch · pytest`

KidsCare MN · Product website — kidscare.click

- Product website for the official Mongolian distributor of OralGos® kids' oral care products.

`Next.js`

PROJECTS

Distributed POS System · University — github.com/JustTuruu/POS-system

- Offline-first multi-branch POS: tills sell on local **SQLite** and sync to the branch server when online.
- Prevented duplicate and lost sales under concurrency with **UUID idempotency keys** and **SELECT … FOR UPDATE** locking.
- Parallel branch sync on a thread pool with CompletableFuture; Strategy pattern for cash, card and QPay.
- k6 load test: **125 tills across 25 branches, 238 req/s at a 0% error rate**.

`Java 17 · Spring Boot · PostgreSQL · SQLite · Docker · k6`

Exam Management System · University

- Teacher dashboard for building exams, timed tests with a live countdown, automatic grading.

`React · REST API · MongoDB`

SKILLS

Languages	TypeScript, JavaScript, Java, Python, C++, PHP, Dart
Backend	Node.js, Express, NestJS, Spring Boot, Apollo GraphQL, REST, WebSocket
Frontend	React, Next.js, Flutter, PySide6
Data	PostgreSQL, MongoDB, MySQL, Redis, SQLite
Infra & tools	Docker, AWS S3, Cloudflare, Vercel, Wowza, k6, Git, Linux

EDUCATION

B.Sc. Software Engineering — Expected Jun 2027
MUST (ШУТИС), School of ICT

COMMUNITY

Google Developer Group on Campus
